- Competitive Analysis
- Interviews & UX Testing
- User Scenarios
- user personas / JTBD / CJM
- Information Architecture

UI / Systems

- Design Systems
- Variables
- Component-Based Design
- HIG / Material Design
- WCAG

Tools

- Figma
- Photoshop
- Illustrator
- Codex
- Midjourney

ABOUT ME

I'm Dina, a designer with a Master's degree in Product Design from ITMO University and a background in graphic design.
I work across UX and UI – from user research, information architecture and user flows to prototyping, interface design and design systems. I'm especially interested in products where complex information needs to become clear, usable and visually consistent

English: B2 (currently improving)

EDUCATION

MASTER'S DEGREE IN PRODUCT DESIGN

ITMO University, 2023–2025

BACHELOR'S DEGREE IN JOURNALISM

Moscow University for Humanities and Economics, 2016–2021

EXPERIENCE

2023 - 2026 PRODUCT / UX UI DESIGNER,
FREELANCE & PROJECT-BASED WORK

Georgian National Museum (Independent Concept)

Responsive design • Interactive Prototype • Component Library • IA

- Restructured the information architecture and navigation
- Built a library of 20+ reusable UI components
- Created an interactive prototype
- Prepared high-fidelity mockups and redline specifications for developer handoff

Outcome: Delivered a comprehensive website redesign concept with responsive layouts, reusable UI components, and developer handoff documentation

Alliance of Digital Humanities Projects

Desktop • UX Research • Interactive Prototype • Brand Identity

- Conducted qualitative research with 40+ participants and identified key user needs
- Developed the information architecture and designed 15 unique screens
- Conducted UX testing and refined user scenarios
- Created the visual identity for the platform

Outcome: The prototype is currently used by the organization as a concept for its future platform

Flamor boutique – Flower E-commerce Store

Responsive design • Prototype • Brand Identity • Print Design

- Conducted extensive competitor analysis
- Developed the UX structure and UI design for the website
- Created the visual identity and supporting print materials

Outcome: The store has been operating with this design for several years; the client reports increased engagement and order volume

Wildberries – Internal Access Management System (University Internship Project)

Desktop • Interactive Prototype • UI kit

- Analyzed existing workflows and conducted a client briefing
- Designed the information architecture, including user roles and permission levels
- Created an interactive prototype and UI kit

Outcome: The concept was presented to the client and used as a foundation for future solutions

2024 - 2025 UX RESEARCHER

Pushkin Digital – UX Research in Digital Humanities

In-Depth Interviews • Surveys • UX Testing

- Designed research plans, interview guides, and study scenarios
- Conducted in-depth interviews and qualitative surveys
- Identified user needs, barriers, and motivations
- Analyzed data, developed insights, and presented findings

Outcome: The research informed educational and technological solutions developed by the organization
